

Veolia Red Lion Contractor Leadership,

This email is going out to a select group of Contractor Leadership who deserve our acknowledgement for their organization's ongoing excellent safety performance when performing work at our Red Lion site.

We recently achieved a significant safety milestone. Seventeen years without a Contractor OSHA Recordable Injury. The start date of this laudable achievement is November 4, 2004 when the plant was under construction.

All of your company employees that have come to our site whether on a regular basis or for shutdown activities are to be commended for their safe work efforts. A positive safety vision begins with leadership so understand that you are the catalyst to ongoing safe and professional work execution.

On behalf of the Veolia Red Lion organization, thank you! Please keep up your efforts to instill a safe work ethic in your organizations. Your effort is recognized and appreciated!

Best regards, Mark Lyman
